Basics of the Tests - Praxis II

There are three types of assessments that fall under the Praxis II

1. **Subject Assessments** - specific to your content area
2. **Principles of Learning and Teaching (PLT) Assessment** - General pedagogical knowledge in bands k-6, 5-9, or 7-12
3. **Elementary Education: Content Knowledge For Teaching (CKT) Assessment** - specific content knowledge for elementary educators

*Find the most needed information and resources from the three types of tests throughout this toolkit.*

While much of what you'll need to know is dependent on the type of Praxis II you are taking and the specific subject, there are basics that apply to all Praxis II assessments. Before we dive in, first you need to figure out which assessment you need to take. Already know? [Click here to jump to what to know prior to and on test day!](#)

Which assessments do you need to take?

Find which test you need to take, the required scores, and additional Maryland-specific information on [ETS' website](https://www.ets.org) or at the Maryland State Department of Education Website - [mdcert.org](https://www.mdcert.org).

Once you know which assessments you need to take, start preparing by finding free materials at [ets.org/materials/prepare](https://www.ets.org/materials/prepare) and searching for your specific test.

Post Test Day

- Scores will be available in your online portal in approximately 21 days
- If you are submitting them for certification you may send test scores to MSDE by: notation on a college transcript, photocopy of the original score report, or official verification from a state department of education.
Questions - What Types, What’re They Asking, How to Answer!

Now that you know the basics of the Praxis II assessments, before diving in and studying for a specific test, it’s helpful to know the types of questions that are on the tests so you can work to decode them and really know what they are asking.

Note: all of the Praxis Study Companion content resources contain similar information under Section 2. Familiarize Yourself with Test Questions. The below examples are from The Praxis Study Companion for Middle School Science.

The Praxis assessments include a variety of question types. It’s important to know the difference so you can ensure you are answering correctly!

See the next page for the different types of questions!

Understanding Computer-Delivered Questions

Questions on computer-delivered tests are interactive in the sense that you answer by selecting an option or entering text on the screen. If you see a format you are not familiar with, read the directions carefully. The directions always give clear instructions on how you are expected to respond.

For most questions, you respond by clicking an oval to select a single answer from a list of answer choices.

However, interactive question types may also ask you to respond by:

- **Clicking more than one oval** to select answers from a list of answer choices.
- **Typing in an entry box.** When the answer is a number, you may be asked to enter a numerical answer. Some questions may have more than one place to enter a response.
- **Clicking check boxes.** You may be asked to click check boxes instead of an oval when more than one choice within a set of answers can be selected.
- **Clicking parts of a graphic.** In some questions, you will select your answers by clicking on a location (or locations) on a graphic such as a map or chart, as opposed to choosing your answer from a list.
- **Clicking on sentences.** In questions with reading passages, you may be asked to choose your answers by clicking on a sentence (or sentences) within the reading passage.
- **Dragging and dropping answer choices into targets on the screen.** You may be asked to select answers from a list of choices and drag your answers to the appropriate location in a table, paragraph of text or graphic.
- **Selecting answers from a drop-down menu.** You may be asked to choose answers by selecting choices from a drop-down menu (e.g., to complete a sentence).

Remember that with every question you will get clear instructions.

**Keep these things in mind when you respond to a constructed-response question**

1) **Answer the question accurately.** Analyze what each part of the question is asking you to do. If the question asks you to describe or discuss, you should provide more than just a list.

2) **Answer the question completely.** If a question asks you to do three distinct things in your response, you should cover all three things for the best score. Otherwise, no matter how well you write, you will not be awarded full credit.

3) **Answer the question that is asked.** Do not change the question or challenge the basis of the question. You will receive no credit or a low score if you answer another question or if you state, for example, that there is no possible answer.

4) **Give a thorough and detailed response.** You must demonstrate that you have a thorough understanding of the subject matter. However, your response should be straightforward and not filled with unnecessary information.

5) **Reread your response.** Check that you have written what you thought you wrote. Be sure not to leave sentences unfinished or omit clarifying information.
Understanding Selected-Response Questions

Many selected-response questions begin with the phrase “which of the following.” Take a look at this example:

Which of the following is a flavor made from beans?
(A) Strawberry
(B) Cherry
(C) Vanilla
(D) Mint

How would you answer this question?
All of the answer choices are flavors. Your job is to decide which of the flavors is the one made from beans.

Try following these steps to select the correct answer:

1) Limit your answer to the choices given. You may know that chocolate and coffee are also flavors made from beans, but they are not listed. Rather than thinking of other possible answers, focus only on the choices given (“which of the following”).

2) Eliminate incorrect answers. You may know that strawberry and cherry flavors are made from fruit and that mint flavor is made from a plant. That leaves vanilla as the only possible answer.

3) Verify your answer. You can substitute “vanilla” for the phrase “which of the following” and turn the question into this statement: “Vanilla is a flavor made from beans.” This will help you be sure that your answer is correct. If you’re still uncertain, try substituting the other choices to see if they make sense. You may want to use this technique as you answer selected-response questions on the practice tests.

Watch out for selected-response questions containing “NOT,” “LEAST,” and “EXCEPT”
This type of question asks you to select the choice that does not fit. You must be very careful because it is easy to forget that you are selecting the negative. This question type is used in situations in which there are several good solutions or ways to approach something, but also a clearly wrong way.

How to approach questions about graphs, tables, or reading passages
When answering questions about graphs, tables, or reading passages, provide only the information that the questions ask for. In the case of a map or graph, you might want to read the questions first, and then look at the map or graph. In the case of a long reading passage, you might want to go ahead and read the passage first, noting places you think are important, and then answer the questions. Again, the important thing is to be sure you answer the questions as they refer to the material presented. So read the questions carefully.

How to approach unfamiliar formats
New question formats are developed from time to time to find new ways of assessing knowledge. Tests may include audio and video components, such as a movie clip or animation, instead of a map or reading passage. Other tests may allow you to zoom in on details in a graphic or picture.

Tests may also include interactive questions. These questions take advantage of technology to assess knowledge and skills in ways that standard selected-response questions cannot. If you see a format you are not familiar with, read the directions carefully. The directions always give clear instructions on how you are expected to respond.

Test Preparation Strategies & Scoring

Prepare for a Praxis Test

Step #1: Learn what the test covers.

You can find test specifications for your test(s) in the free Study Companion. Each Study Companion includes a comprehensive overview for the test, with detailed test descriptions and sample questions with answers and explanations to help you prepare.

*Find the ETS study companion for your test by selecting it here!*

Step #2: Assess how well you know the content.

Praxis II assessments are specific enough that you should not overestimate how prepared you are, especially if you have not studied your content area in more than a few months.

After taking a pre-assessment for the selected test, you should rate how familiar you are with the test content to determine which areas of the test to focus on.

Step #3: Collect study materials.

Obtaining and organizing your materials for review are critical steps in preparing for the *Praxis* tests.

**TIP** - use your self-assessment to ensure you are spending your time where you need both in collecting study materials and studying!

Here are a few questions to consider in finding materials:

- Did you take a course in which the content area was covered? If yes, do you still have your book(s) or your notes?
- Does your library (college, local, school system) have a textbook?
Step #4: Plan and organize your time.

You can begin to plan and organize your time while you are still collecting materials. Allow yourself plenty of time to review so you can avoid "cramming" new material at the end. Here are a few tips:

- **Choose a test date** far enough in the future to leave you plenty of preparation time.
- Work backward from that date to figure out how much time you will need for review.
- Set a realistic schedule and stick to it.

Step #5: Develop a study plan.

A study plan should be developed off of your self-assessments ensuring your roadmap to success is based on your skills and knowledge.

**TIP:** Study to the test! It's a lot to cover, so really spending time on what's on the test and what you need to work on will allow you to break it down into manageable pieces.

*Click here for sample study plans and steps to creating a study plan!*

Step #6: Practice explaining the key concepts.

The **Praxis® Subject Assessment constructed-response tests** assess your ability to explain material effectively. As a teacher, you'll need to be able to explain concepts and processes to students in a clear, understandable way. What are the major concepts you will be required to teach? Can you explain them in your own words accurately, completely, and clearly? Practice explaining these concepts to test your ability to effectively explain what you know.

Step #7: Understand how questions will be scored.

*Scoring information can be found in the Study Companion for each test.*
Praxis Scores Overview

Getting Your Official Scores
Official score reporting dates vary, depending on which test you took. Go to Getting Your Praxis Scores for detailed information on the score reporting dates.

Sending Your Scores
During registration, you may identify up to four institutions or licensing agencies to receive your Praxis scores for free. You may also order additional score reports after the test for a nominal service fee. Learn more about ordering score reports.

Understanding Your Scores
You received your score report. What does it all mean? For more detailed information, read Understanding Your Scores.

Scoring Services
If you feel that you didn't perform up to your potential on a test or that your scores may have been reported incorrectly, there are steps that you can take. Learn more about available Scoring Services.

Types of Praxis II Assessments

Subject - Praxis II Subject Assessments measure two things that you will teach as a K–12 educator:

1. Knowledge of the specific subjects
2. Teaching skills and knowledge (general and subject-specific manner)

Principles of Learning and Teaching - This test will assess your knowledge and understanding of foundational educational practices. The test content assesses your knowledge of topics such as:

- human development
- learning processes
- instructional processes
- diverse learners
- educational psychology
- professional issues.

NOTE: After June 30, 2022, all teacher candidates must take either the edTPA or PPAT to fulfill the pedagogy assessment requirement. Click here for the edTPA MSDE rubric.

Find your test number and qualifying score here.
PRAXIS II RESOURCES - ALL ASSESSMENTS

There are many Praxis II assessments, and most educators have to take multiple assessments to receive their certification. Not every assessment is covered in this toolkit, but don’t panic there are a few tried and true resources that are a great place to start for every assessment.

**ETS** - is the company that writes the Praxis assessments. They have some basic resources for every single assessment. Be sure to check-out the study companion and study plan for each individualized assessment.

**Preparation Materials**

---Select a Praxis test by name---

**Early Childhood Education (5025)**
- Study Companion (PDF)
- Study Plan (Word)

**Mometrix** - offers free practice tests for many of the assessments areas. Search by test number!

**Study.com** - has a free 30-day trial for Praxis review sessions. The materials include a syllabus, a review, and practice tests.

**Quizlet** - community created study flashcards, so you can spend your time studying not making flashcards. Search by test number!

**Khan Academy** - is designed for students to dig in on specific subjects. It won’t have practice tests for Praxis II but is a great place to sharpen skills and knowledge of specific topics that are covered on a Praxis II.

*This is not a full list of what Khan offers, but an example of the types of topics covered.
